

STUDY SCHOLARSHIPS FOR PUPILS AND STUDENTS

Providing well trained human resources is an ongoing concern and one of the company's management priority. Therefore COMPA involves itself in supporting pupils and students by granting scholarships during their training period.

During the school/academic year 2013-2014, COMPA has granted 10 scholarships for the pupils from "Henri Coanda" Technological High School and 5 scholarships for students from "Lucian Blaga" University who had achieved good results in learning and who had showed high interest during the practical classes and laboratories.

The scholarship recipients have the chance to carry out the practical classes in a modern work environment using performing equipments under the direct supervision of experienced tutors. After graduation they will get a stable job, in a successful automotive company.
